

LED Light Bulbs

LED Light Bulbs PAR38 LED Spotlight

PAR38-LED Spotlight

The economical, high-quality spotlight is perfect for those hard-to-reach places where it's difficult or dangerous to change the light bulb. The 65 LEDs use only 3 watts of power in the 120 Volt model--and 2 watts in the 12 Volt model—and can last more than 11 years. Use it as a porch light or in a motion sensor can save a lot of money over the life of the bulb. It's also great for illuminating signs, addresses, and other things that need to be well lit. Available for 120 Volt systems and 12 Volt systems. Weight: 12.5 oz. Size: 4.75 " Diameter.

Warning: To install the 12V version in a 120V socket would damage the bulb.
